

STATSEAL[®]

StatSeal[®] is intended for use under the care of a healthcare professional for the temporary external control of bleeding from sheath and catheter removals.

Each application includes one (1) bottle of **StatSeal Advanced Topical Powder**, one (1) powder containment device (PCD), one (1) PCD foam insert and one (1) product description label.

Instructions for Use

1. Open sterile packaging and remove contents. Remove paper backing from PCD to expose adhesive.
2. Center PCD around access site with adhesive side down.
3. Fill PCD to brim with powder; **do not overfill***. Place PCD foam insert over powder to cover.
4. Pull sheath slowly while applying pressure directly over puncture site.
5. Hold **continuous**, semi-occlusive pressure over puncture site for ≥ 5 minutes. Extend hold times as necessary for larger sheaths or anticoagulated patients.
6. Release pressure slowly by rolling fingers off of PCD.
7. Place transparent dressing per protocol. Apply product description label over dressing.
8. Leave powder in place for 24 hours.

*The bottle contains extra powder in case of a rebleed. If bleeding continues, reapply more powder as necessary with manual compression until bleeding stops.

Additional instructions and procedural tips are available at:

INS-SS-05

STATSEAL®

Ingredients: Hydrophilic polymer and potassium ferrate

WARNINGS: FOR EXTERNAL USE ONLY. Not intended to replace stitches. Do not apply to visibly infected wounds. May be harmful if inhaled or ingested. Avoid aspirating product into the nasal or oral cavity. Avoid contact with eyes; if contact should occur, thoroughly rinse eyes with water. Keep out of reach of children.

CAUTION: Store in a clean, dry place. Use by expiration date listed. Discard if product is damaged, opened or if powder is clumped and does not flow freely. Discard contents after use; powder is guaranteed to work only if it has NOT been left exposed to air and humidity. After use, the remaining bottle contents and the applicator tip are no longer sterile.
